## Monitoring ensures safety – a vibration sensor on every unit with the FAG SmartCheck

The FAG SmartCheck is a new, innovative measuring system for the real-time monitoring of plant and machinery. **Online monitoring of small, partly redundant units is cost-effective** with SmartCheck due to its attractive price.

This means the FAG SmartCheck makes a valuable contribution to optimizing processes and reducing lifecycle costs (LCC) and the total cost of ownership (TCO).

### Features of the FAG SmartCheck:

- Compact dimensions: approx. 44 mm x 58 mm x 45 mm
- Records a large number of operating parameters, e.g. vibration, temperature, pressure or flow rate
- Easy to operate without expert knowledge
- Ready for immediate use due to the parameter templates supplied
- Basic operating functions can be carried out using keys
- Alarm warnings are displayed by LEDs on the housing

### The advantages at a glance:

- Reliable machine and process monitoring
- Optimization of processes by bundling information
- Reporting provided as a customer service
- Patented, innovative alarm function
- Access concept for data security
- Several years of history data can be stored
- Reduces cabling outlay

## Service catalog for maintenance: New layout and many new products

The new edition of the Schaeffler service catalog is available: This standard work for maintenance is now available in a completely revised layout and format. This means browsing through the products, services, and training sections is now even easier.

It presents a wide range of new and proven products and services for fitting and maintenance for rolling bearings on nearly 140 pages.

The catalog can be ordered free of charge at this e-mail address:

<mailto:info@schaeffler-iam.de>.
